

Michele Dellaquila

Junior react developer & junior full-stack developer.

About me

I am passionate about software developer with 3 years of experience. I love technology and I spend a lot of time to improve my knowledge, stay updated and discover tools. In these two years I have developed web applications and applications for iOS and Android devices with react and react native, I have used several frameworks for jobs in my city like WordPress or bootstrap. I am an ambitious person who loves to work in a team, propose ideas and collaborate.
